DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-7, 10-17 rejected under 35 U.S.C. 102(b) as being anticipated by Maes.
- 3. As per claim 1, Maes et al. discloses a system for authentication of a party in a transaction conducted over a communication network(see col. 7, lines 57-65), a wallet-sized storage medium(i.e. smartcard)(see col. 14, lines 21-22) containing information uniquely associated with the party read by a conventional computer operated by the party as part of the transaction; and an authentication server remote from the computer that receives the stored information(i.e. digital signature) and a personal code(i.e. PIN) entered by the party(see col. 8, lines 25-27) from the conventional computer as part of the transaction and authenticates the party to the transaction upon matching of the stored information with the personal code based upon information in a preexisting database(see col. 14, lines 17-46).
- 4. As per claim 2, Maes et al. discloses wherein the stored information is transmitted from the conventional computer to the authentication server via a computer of a second party(i.e. ATM or POS terminal)(see col. 14, lines 17-45).
- 5. As per claim 3, Maes et al. discloses wherein the personal code is transmitted from the conventional computer to the authentication server via the computer of the second party(see col. 14, lines 21-26).

Page 3

Application/Control Number: 09/816,975

Art Unit: 2131

- 6. As per claim 4, wherein the stored information are one-use tokens.
- 7. As per claim 5, Maes et al. discloses wherein the stored information is a digital certificate(see col. 14, lines 21-24).
- 8. As per claim 6, Maes et al. discloses wherein the personal information is a password(see col. 14, lines 21-24).
- 9. As per claim 7, Maes et al. discloses wherein the wallet-sized storage medium is a truncated CD(i.e. smartcard)(see col. 14, lines 22).
- 10. As per claim 10, Maes et al. discloses copying to a document generated by the application information from a wallet-sized storage medium read by the conventional, the copied information uniquely associated with a user interacting with the application(see col. 3, lines 17-
- 37). Further, as per claim 10, limitations have already been addressed(see claim 1).
- 11. As per claim 11, limitations have already been addressed(see claim 1).
- 12. As per claim 12, limitations have already been addressed(see claim 2).
- 13. As per claim 13, limitations have already been addressed(see claim 3).
- 14. As per claim 14, limitations have already been addressed(see claim 4).
- 15. As per claim 15, limitations have already been addressed(see claim 5).
- 16. As per claim 16, limitations have already been addressed(see claim 6).
- 17. As per claim 17, limitations have already been addressed(see claim 7).

Claim Rejections - 35 USC § 103

18. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Page 4

Application/Control Number: 09/816,975

Art Unit: 2131

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 19. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maes et al. in view of Lambert et al.
- 20. As per claim 8, Maes does not disclose wherein the stored information includes at least two groups, each of which, upon matching the personal code by the authentication server, authenticates the transaction for a different level of security or authority than authentication thorough the second group; Lambert however discloses wherein the stored information includes at least two groups, each of which, upon matching the personal code by the authentication server, authenticates the transaction for a different level of security or authority than authentication thorough the second group(see col. 2, lines 2-13, 30-33).
- 21. It would have been obvious to one of ordinary skill in the art to combine Maes with Lambert, because Lambert discloses that problem arises when seeking to control access to data where a number of different users are required to be allowed to access different sets of data such as an ATM(see col. 1, lines 11-21, 48-50). Lambert discloses that a conventional approach to this problem included having a table lookup process of the user, however, Lambert discloses that lookup tables are vulnerable to breaches of security(see col. 1, lines 58-67 of Lambert), thus in Lambert's system the lookup data is stored on the smartcard.
- 22. As per claim 9, Lambert discloses wherein the user has at least two personal codes that may be matched to the stored information, each of which, upon matching with the personal code by the authentication server, authenticates the transaction for a different level of security or

Application/Control Number: 09/816,975

Art Unit: 2131

authority than authentication thorough the second personal code(see col. 2, lines 2-13, 30-33).

Also, as per claim 9, same motivation applies(see claim 8).

- 23. As per claim 18, limitations have already been addressed(see claim 8).
- 24. As per claim 19, limitations have already been addressed(see claim 9).

Double Patenting

25. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

26. Claims 1-3 and 11 of 09/816975 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, and 9 of copending Application No. 10/132438. Although the conflicting claims are not identical, they are not patentably distinct from each other.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

27. As per claim 1 of 09/816975, and claim 1 of 10/132438, 10/132438 claims the storage medium integrally including additional information uniquely associated with the party. It would have been obvious to include this limitation in 09/816975 the motivation is that the storage

Application/Control Number: 09/816,975

Art Unit: 2131

medium can include additional information such as the stored information and personal code of the party, because the storage medium is used in order to perform a transaction, and thus the party is authenticated based on this information. Further, as per claim 1 of 09/816975 and 10/132438 recite same limitations.

- 28. As per claim 2, of 09/816975, and claim 2 of 10/132438 recite same limitations.
- 29. As per claim 3, of 09/816975, and claim 2 of 10/132438 recite same limitations.
- 30. As per claim 11, of 09/816975, and claim 11 of 10/132438, 10/132438 claims storage medium integrally including additional information uniquely associated with the party, 09/816975 claims prompting for and receiving entry by the conventional computer of personal code of the party. It would have been obvious to include the limitation above(10/132438), because the storage medium is used in order to perform a transaction, and thus the party is authenticated based on this information.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenise E Jackson whose telephone number is (703) 306-0426. The examiner can normally be reached on M-Th (6:00 a.m. - 3:30 p.m.) alternate Friday's.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Shiekh can be reached on (703) 305-9648. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
